
Can not login or activation email is not received?

Posted by vivociti - 2007/09/04 12:31

Recently I have received some emails from newly join members asking why they could not login after registration.

Here my suggestions are:

1. After registration, try to wait for a while to receive an activation email from VivoCiti.com.
2. After received you can click on the link to activate your account.
3. If you didnt receive activation email by 24 hours, you may contact us to help you activate your account manually.

Regards,

sunwu
