
skype plugin

Posted by sekhmet - 2008/06/01 11:28

Hi,

I am desperately searching for a skype plugin for CB which would allow users to simply input their skype usernames, in order to generate a skype icon for their profiles.

Thanks

I've tried none of the plugins seem to work, and if they do they do not offer the effect that I am looking for. I have seen it done however on other sites.
