
Vivo YouTube works in Firefox but not on IE 7

Posted by alan2000 - 2008/06/11 07:39

you can see the diferenz on my wp. <http://www.swissvista.ch> on front of Firefox works but on Internet Explorer not. Can someone help to fix this problem ?

Thanks

guys, not sure why yours are not working with IE 7. I have tested it on IE 7 and Firefox before rolled it out. Higher chance it may be due to slow video loading in IE 7 ?
(not try to promote Firefox, but most of the J2EE/PHP websites I prefer to use Firefox to access)

If you can see this article with embeded video using the same plugin, then i think something is not set up properly for yours.
