Hi. I am currently looking for an hack of an existing CB Plugin for Mosets Tree.

The current plugin shows a list of the Users reviews in the CB Tabs.

I need one that also shows what listing they added as their favorite and a list of the listing they supplied.

I have tried to do this but I am not a PHP coder.

There is alot of people who is looking for something similar on the Mosets forums.

You are welcome to mail me at [joedwink-wink.co.za](mailto:joedwink-wink.co.za)

Thanx <http://vivociti.com/images/fbfiles/files/pluginmosTreeReviews.zip>
