
Mosets Tree CB Plugin

Posted by The Source - 2008/07/23 11:29

Hi. I am currently looking for an hack of an existing CB Plugin for Mosets Tree.

The current plugin shows a list of the Users reviews in the CB Tabs.

I need one that also shows what listing they added as their favorite and a list of the listing they supplied.

I have tried to do this but I am not a PHP coder.

There is alot of people who is looking for something similar on the Mosets forums.

You are welcome to mail me at joedwink-wink.co.za

Thanx <http://vivociti.com/images/fbfiles/files/plugmosTreeReviews.zip>
