
Google FriendConnect

Posted by nash4nashville - 2009/03/26 13:34

This thread discusses the Content article: Google FriendConnect

Worked out of the box on Joomla 1.9 with SEF turned off.

Absolutely genius way to give your users an easy way to spread the word about your site on all their Social sites.

This is a great alternate, be it more of a upgrade to the core joomla Google plugin which has never worked for us on Linux.

Our client's primary site Vern Gosdin - The Voice of Country Music will greatly benefit from this wonderfull Google Friends connect joomla extension.

Thank you.

Nash
