
use program with remote host (at hosting provider)

Posted by bitje - 2007/11/02 22:02

Can it be made possible to use this program with a joomla installation that is hosted at a hosting provider?

Thanks a lot for this wonderful program

hi bitje, thanks for this feedback. current version doesn't support yet. Yes, I m planning want to make this possible, either via Joomla own API or other protocol but so far havent had studied yet. Or..someone may feedback to me to make this happen earlier :)
