## pass query data?

Posted by kindoflost - 2008/03/08 08:06

---

Vivo Chart looks great. Have a question though: is it possible to pass the data with a mysql query? May be a future feature candidate? This is what joomPie offers, although they don't offer a line chart, only the pie... Thanks

hi,  
thanks for the compliment.B)  
current version doesnt support such feature, however i think it is good idea & feedback and i will say it is not difficult to extend this plugin to support such feature but need hours for that sort of dev.  
anyone is interested ? this plugin is under GNU/GPL, so feel free to modify / extend and contribute back to the community.  
:silly:
