
Translator images and background color

Posted by Riceman - 2008/05/15 15:54

Is there anyway to alter the flag images and the background?

- Change background color or use background image?
- Make Flags bigger?
- Put Flags on One line? Right now they are on three? (adjust width of module)
- delete flags so there are only the desired languages?

Thanks

OK, I modified the mod_babelfish15.php file and the images and got it working. Great!
