
Vivochart

Posted by jensl1972 - 2008/05/18 09:56

Hi there!

I'm trying to get Vivochart working.

I seems to be accepting the code as below but I only get a small star in firefox and a missing pickture red x in ie.

```
{vivochart}cht=p3&chd=t:90,49&chs=350x150&chl=Foo|Bar{/vivochart}
```

See example here:

http://landbrug15.web.surftown.dk/index.php?option=com_content&view=article&id=5:diagram&catid=2:gaardbeskrivelser&Itemid=2

It's a 1.5 Joomla and I'm using the plugin for 1.5

hi...

I downloaded again and it still does not work for me:(

here is what the output of the mambot :

```
{vivochart}cht=p3&chd=t:90,49&chs=350x150&chl=Foo|Bar{/vivochart}
ar"/>
```

cheers

mooo

hi moo,

tried to copy and paste the same code, but mine can work fine under joomla wysiwyg editor (in bold/plain). yours is under wysiwyg editor / non wysiwyg ?
