
Feedburner RSS Email Subscription Module

Posted by shaheem - 2009/08/25 19:25

I am able to install this module successfully. However - am struggling with ffid.

Google has replaced ffid with something else?

I have gone into my feedburner account and activated email subscription under publize tab too. So now I am looking for "ffid" in the copy paste HTML code. I suspect that it is the value after "uri=" however I keeping getting message The feed does not have subscriptions by email enabled".

Can someone email me at shaheem@html.com or post a sampled solution - please.

I feel the same way like shaheem
Please confirm if anybody know the answer

yep, latest feedburner format has been redirected to Google, <http://feedburner.google.com>

FFID is now called URI.

I have done minor patch to the module, you guys can get it from:
Joomla Module for Google Feedburner
