
Facebook_like_box not showing on one page

Posted by raunhar - 2011/02/22 00:19

I am using this module for a web site. The module is being shown all pages except home page. But on a particular page (using ArtForms component), this module is not showing up. On other ArtForm pages it is showing up.

The link where it is not showing is:

http://bachpanglobal.com/index.php?option=com_artforms&formid=2

What can be done to show it here also.
