Hi,

Im having some problems with the Google Plus one Button Mod.

It shows on my content, but when i click the +1 I get the below message:

If the +1 button is unavailable or has stopped working, you'll see this image:

A +1 button error can occur for a variety of reasons, including the following:

â€¢Server timeout: Check your Internet connection and try refreshing the page.

â€¢Blocked profile: If your profile has been blocked, you won't be able to +1 content.

â€¢Apps user: Check with your domain administrator to see if Google Profiles is enabled.

Mod Version: 1.0

Excluded content: null

Excluded categories: null

position: After Content

Css Style: float:left;margin-left:5px;

Button Size: Standard (24px)

With Counter: True

Language: English(UK)

I can +1 the content on your site, so im guessing my profile isnt blocked, also guessing the server isnt timing out.. So the only other option is the google profiles is enabled??? Which i havent a clue about..

Any ideas?

Thanks

Shenn
