## Re:Facebook Like Box

Posted by mheck21 - 2011/03/22 20:56

---

After I installed it and put my Facebook ID in I just get a white box and at the top of it a facebook logo that says go to facebook.com...what did I do wrong.

Also, do you have the plug in that I can put a like on the article I posted so people click like and it likes it on there facebook.

I am using Joomla 1.5

Hi guys, I have installed this widget on Wordpress which works perfectly, on our Spanish blog. Now I would like the widget to be displayed in Spanish instead of English.

Normally when you change this piece of code [http://connect.facebook.net/en\\_US/all.js#xfbml=1](http://connect.facebook.net/en_US/all.js#xfbml=1) to [http://connect.facebook.net/es\\_ES/all.js#xfbml=1](http://connect.facebook.net/es_ES/all.js#xfbml=1) that should work though now I don't see anything change, any advise? I'm editing the plugin PHP code

thx for this easy to use module. One day after a succesful installation - the likebox are only showing the error message: "The page you are trying to access is restricted or unavailable"

I followed the instructions and it worked yesterday. Does anyone have an idea how to solve this?

The Like box works great on one of my sites, but on another, I'm just getting 'Could not retrieve id for the specified page. Please verify correct href was passed in.' I have tried a couple of different FB accounts and it didn't work. Any suggestions? Do I need to change a permission on FB?  
Thanks

Thank you for building a plug in that everyone seems to be very satisfied with. Unfortunately for me, I cannot get it past installation. I get this message:

Install failed - Invalid install directory

Can you please advise? I attempted to upload the full zip file that was downloaded.

Thank you.

hi thekey,  
check joomla folder access right on your hosting env. you will have the same problem by installing other modules & components.

This plugin works great!(Thanks for the developer!) One problem do exist on my end. It shows multiple faces from the same person in the connection box unless I log in to my facebook page on the same computer and everything will be just fine. Am I the only one who encountered this problem? Any help is greatly appreciated.
