
Babelfish.....no flags?

Posted by kyla - 2008/01/26 12:26

Hi.....downloaded this module and appear to love it, but.....no flags are appearing on the site? I tried uninstall and reinstall....but nothing. Any ideas?

Thanks.....Kyla @ 1800deargod.com

Same problem... Joomla 1.5 stable, legacy mode enabled.

pls download again. Have uploaded the wrong zip which only support Joomla 1.0. This latest zip should solve your problem running under Joomla 1.5
