

Meebo Chat Room Component

Meebo Rooms are multimedia-capable chat rooms that can be put anywhere on the Web. Visitors to any site that embeds a Meebo Room are automatically added to the room's buddylist, so they can instantly chat and share content with other users.

Let Meebo Chat Room:

- Transform your site in minutes with "live" community messaging rooms that your users will love.
- Meebo serves the room into your site and Meebo take care of all the messaging traffic. And it will mean you can save your website bandwidth
- Social and server-based moderation features ensure good behavior.
- Users spend more time and consume more content, so your site metrics go up.
- Embed functions let your users spread your brand across the Web.

With VivoCiti Meebo Chat Room component, you can provide Meebo Chat Room service with instant installation:

- First, click this link: Meebo.com to get one free room ID for your website
 - Click on "Create a Room" button and click on "next" button
 - On next screen, you can fill in your Room's name, size, colour etc. After finish customizing, click on "next" button again
 - On this screen, you can sign up for Meebo account or can click on "skip" button. For this tutorial, let's click on "skip" button
 - Next screen will show you a generated HTML code for your website chat room. You can write down the room id as circled in red colour as shown on following screenshot:
