
Jaxtx will not install

Posted by slowly - 2008/04/21 05:19

Sirs:

When I try to install Jaxtr i am getting the following:

* It was not possible to copy the selected file.

* JInstaller::install: Failed to copy file:

/home/slowly/public_html/petfoundation/tmp/install_480c1fd2d070a/images/mod_Jaxtr15.png to
/home/slowly/public_html/petfoundation/modules/mod_Jaxtr15/images/mod_Jaxtr15.png

hi,

it is likely you have downloaded wrong version cause i have tested them on: Joomla 1.0.x, Joomla 1.5.1 and Joomla 1.5.2

so you will need to download the correct version.

Joomla 1.5.1 and Joomla 1.5.2: [download here](#)

Joomla 1.0.x: [download here](#)

Thanks for the help.

I re-downloaded the file and re-install but I am getting the same error.

" * It was not possible to copy the selected file.

* JInstaller::install: Failed to copy file:

/home/slowly/public_html/petfoundation/tmp/install_480cc64310348/images/mod_Jaxtr15.png to
/home/slowly/public_html/petfoundation/modules/mod_Jaxtr15/images/mod_Jaxtr15.png"

hi, could it be due to your previous failed installation: you can check by going to
/home/slowly/public_html/petfoundation/modules/ folder and remove mod_Jaxtr15 sub-folder if exist.

secondly, could it be due to folder permission.

not really sure what weird problem you re facing since i can install properly for 1.0.x, 1.5.1 and 1.5.2

hope it helps

alternatively, you can consider to edit the xml source itself not to incl/install that png file and after installation, just do manual copy to the new target folder

I have to download joomla 1.0 and persist the error:
/home/ncarruse/public_html/media/install_481067ef5407c/images/mod_Jaxtr.png to
/home/ncarruse/public_html/modules/images/mod_Jaxtr.png

permissions?!

Hi,

I am getting the same problem. I installed the correct version but it will not let me install the module. Please give some assistance.

Andre
