
multi adsense module for joomla

Posted by prosperity66 - 2008/05/12 16:48

Hi :)

I use multi adsense for joomla but don't see the ads on the pages. Is it normal?

On the other hand, is there a way to put the ads INTO the content (above and not inserted into the text) instead of on the left or the right of the site?

Thanks for the reply.

no, that s not normal. have u set your publisher id and enabled the module ?

for displaying on content, you will need Google Adsense plugin. So far, I havent released any on VivoCiti.com. Check at joomla website.
