Vivochart is not working under a Custom Module

Posted by perieteanu - 2009/01/29 09:14

Very good component. Does what it says.. but when i try to use it inside a Custom module in Joomla 1.5 i see that is not working at all.

Re:Vivochart

Google Charts are API and react to a URL so it wouldn't work in a module per se.

I have done a work around successfully though....

1. Create a new module.
2. In 1.5 choose the module to be a wrapper.
3. Enter the URL of your chart in the url field
4. Publish.

The chart now shows up in a module.

You don't actually need the Joomla extension to do this.
