
SOBI and Google friend connect

Posted by purjuju - 2010/10/26 11:44

Hi all!

I want to use GFC (Google Friend Connect) to rate each entries in SOBI. I don't want to rate categories and I don't want to rate general paes like "home, contact etc...).

I found this module for joomla: <http://vivociti.com/content/view/72/53/> but it doesn't work for sobi because sobi can't read xml file

If I install GFC via joomla, the module appears everywhere, I mean on each pages, on each entries as well !! But I want only on each entries.

Could you help me please?

Thank you very much.

(sorry for my english... I'm french)
