
non-Windows?

Posted by deafbiz - 2007/10/04 01:52

Will this work on Ubuntu or Mac without Microsoft .NET?

hi-

For non Windows version, my current plan is to release it using MONO runtime under UBuntu & other linux distros, perhaps another 2 wks.

For Mac, I m not sure if MONO also support runtime for Mac but for sure, I dont have testing env. for that so priority still given to Linux env. first.
